

# In Office Cholesterol Screening Waiver

Dear Parents and Guardians,

In order to provide the most comprehensive and convenient care your child(ren) Alliance Pediatrics has brought an additional service to our in house laboratory, Lipid Panel Screening (Cholesterol Screening).

While most insurance plans pay for this test, there are a few that will forward the cost of the test to the member. This cost is \$15.00. As a courtesy, we will bill this test to your insurance company; however, your next statement may reflect the denial of the test and the balance of \$15.00 due.

Some insurance companies known to deny this test:

BCBSFL City of Gainesville

BCBSFL Shands

Avmed (*Also note that Avmed does not reimburse for flu tests in office*)

\*The more Members that call their insurance companies to protest the denial of this test, the more likely they may be to reimbursing this test in the future. \*

Your provider feels that this test is a great asset to providing instant results and the ability to identify health risks and serious medical conditions at your well child check.

By signing this waiver, you understand that you may be responsible for the cost of the test and agree to the charge of the test if unpaid by your insurance company.
