

INFORMATION FOR CLOSE CONTACTS OF COVID-19 PATIENTS:

People who have had close contact with someone who is confirmed to have, or being evaluated for, COVID-19 should:

- 1. Monitor your health.** Start from the day you first had close contact with the patient and continue for 14 days after your last contact with the person. Watch for these signs and symptoms:
 - Fever. Take your temperature twice a day.
 - Shortness of breath or trouble breathing.
 - Other early symptoms to watch for are chills, body aches, sore throat, headache, diarrhea, nausea/vomiting and runny nose.
 - **If you develop fever or any of these symptoms, call your health care provider right away and let them know about being a close contact to a patient with COVID-19 so they can prepare for your visit. Ask you health care provider to call the local or state health department.**
- 2. Continue with your daily activities if you do not have symptoms after 14 days.** You can return to work, school, or other public areas after being symptom-free for 14 days.
